

PRESENTATION POLEGATE TOWN COUNCIL 30TH July 2018

- Pleased to see District and County Council reports have returned to the agenda. Perhaps now with better communication the Council can concentrate on the issues they were elected for and not divert into other council's areas.
- Can the chairman of the building and land working group explain?
- Why has the maintenance and cleaning of the CCTV columns been deleted from this years budget, when we are seeing high levels of vandalism. Surely, we need our best deterrent working at its maximum efficiency.
- Why was shredding and mulching not part of the grass cutting contract which would have decreased the amount of grass blown about the town blocking up the drains
- Why do we have to wait until 2019 before a street lighting improvement tender is sent out especially since the buying power has already decreased by 6.3% delays. A task which should be completed easily within three days.
- Why is the council still pouring money in the not fit for purpose High Street Toilet.
- Lastly and most important why is the council failing to safeguard our children by not carrying out regular inspections and maintenance of playground equipment by competent staff in accordance with national guidelines. Why is council sending out mis-leading information on social medium on this issue?
- Record to date this council administration has achieved nothing in improving the infrastructure for which they are responsible only talked about it.

POLEGATE SIGNAL BOX

- Council already agreed no cost to the Town
- Who is paying for the fixing design, installation and subsequent ongoing maintenance.
- Sign on its own meaningless needs an explanation why it is there.
- Wish the former Mayor be more responsible and stop alarming residents of how the high voltage cables are installed. He has been told many times and his letter contains mis-leading information
