10345	<p>Consultation on Community Infrastructure Levy (CIL) Preliminary Draft Charging Schedule</p> <p>The following comments regarding the Charging Schedule:</p> <ol style="list-style-type: none"> 1. <u>Allocation of the lower mid and higher tiers to areas</u> The Town Council are concerned Polegate has been allocated as <i>lower tier</i>. Whilst appreciating the evidence based data, this will inevitably encourage more building in the south of the district where rates are lower. This will indirectly force the house prices in the North up further, unbalancing the North and South. 2. <u>Issues arising from the tier rates that have been set</u> Although the rates have been set mid range to minimise the need for review changes, the difference in price in the proposed tier values from lower to higher band is £70 per square m and is significant enough to make the higher rate a more elite area. There are significant financial variations between the three tiers. 3. <u>Loss of Potential Planning Gain</u> The Town Council consider setting the lower rate for Polegate as poor planning. Polegate is on a main train commuter route. Unless there are plans to totally change the infrastructure in the area, any further development cannot be serviced by roads 	

	<p>satisfactorily. If the fast link train to London goes ahead Polegate will be seen as a particularly good town to be located, (close to Eastbourne) and demand for housing is likely to increase. By setting Polegate within the lower tier the effect is likely to force development into this area. However the tier value proposed is low which will result in more development but Wealden District Council and the Town Council will receive lower rates of planning gain restricting the funding available for required infrastructure.</p> <p>4. <u>Boundary issues</u> It is expected that South Downs National Park will set their tier rate higher than Wealden pushing developments into the lower tiered areas. Polegate is on the boundary of South Downs National Park and Eastbourne Borough, if either of the two set their tiers higher this will naturally force development out of their areas.</p> <p>It was resolved to submit the above response for the CIL consultation.
