	<p>there was no issue with the application and it would not comment to make on the lawful development itself. It was on a rurally located farm area. From the photos and knowledge of the local area there appeared to be gas cylinders and the committee was aware that welding was probably taking place there. The members asked that there were assurances that the appropriate health and safety checks were being made, although any incidents were unlikely to affect many people locally other than workers.</p> <p>It was resolved to submit no comments regarding the lawful development itself but to submit a brief comment that the Council would like assurances that the appropriate health and safety issues would be addressed.
